More and Better Crops,  
 with Stoller's® FLOWER POWER™

STOLLER® brand Products  
**Flower Power™**

For Powerful Pollination And Improved Marketability

### PRELIMINARY PRODUCT INFORMATION

The Stoller Group has developed a foliar product to enhance pollination and increase flower strength even when conditions are not conducive to healthy flowering and pollination. This product is now available in Australia.

Poor pollination is a problem with many crops, especially when temperatures are outside the optimal range and when there is a problem with bee activity or population.

**Flower Power** contains elements essential for health pollination. Zinc is critical in keeping levels of plant hormones (especially auxin) at good production levels while Boron is important for pollen tube formation and for extending the life of auxin in the plant.

#### Product Analysis

Element	%w/v
Zinc	5.0%
Boron	3.8%
Copper	0.1%
Molybdenum	0.02%

*Contains Stoller's Proprietary Growth Stimulant Mix*

#### Product Benefits

- *Better pollination*
- *Stronger flowers*
- *Increased fruit numbers*
- *Crop performance with less bees*
- *Key nutrients for strong pollination*
- *Improved physiological fruit properties*
- *Improves hormone balance for more even flowering*

**Flower Power On Squash  
 with & without bee pollination**
